The Green Village

3,632 followers

1mo • Edited •

Een circulair en modulair **#zonnepaneel**! ☀️ **Biosphere Solar** brengt deze **#innovatie** naar The Green Village, die hoogwaardig kan worden **#gerecycled** en waar nodig gerepareerd.

In onderstaande video legt **Tim Kaasjager** uit hoe het modulaire ontwerp demontage mogelijk maakt, en hoe in tegenstelling tot conventionele zonnepanelen, dit paneel is ontworpen met aandacht voor herstel van de **#biodiversiteit**. Hierbij wordt gewerkt met materialen die onder eerlijke werkomstandigheden gedolven en geproduceerd worden.

Op The Green Village zullen de panelen **#energie** leveren aan de omliggende gebouwen, terwijl de efficiëntie en de bestendigheid van de panelen wordt bijgehouden. Daarnaast wordt de biodiversiteit onder de panelen gemonitord. 🌱

VDL Bus Valkenswaard schoolt in drie stappen haar medewerkers om naar e-monteur

Zo'n 90 medewerkers van VDL Bus Valkenswaard zijn door Mikrocentrum opgeleid tot volwaardige e-monteurs, klaar om de elektrisch aangedreven bussen van nu en in de toekomst te assembleren. Veilig werken met hoogspanningscomponenten volgens de NEN 9140 norm was een van de belangrijke onderdelen van de opleiding.

MOBILITY

This passenger car captures more CO₂ than it emits while driving – and it was built by students

SELECTED 25 JULY 2022

Auto Zem van studententeam Ecomotive © Bart van Overbeeke

The New York Times

“ Last year **BMW made a splash** at the International Motor Show in Munich with the iVision, a concept car it said is completely recyclable. **But those efforts are way behind a lesser known student effort at Eindhoven University of Technology** in the Netherlands, which has been producing recyclable concept cars for years. The students, who are now on their fourth generation of this vehicle, which this year is called ZEM, for Zero Emission Mobility, may **still be ahead of the majors.** ”

E-MAGY'S INNOVATIVE SILICON FOR NEXT-GEN BATTERIES CONFIRMED TO HAVE NEAR-ZERO SWELLING BY ZSW

Broek op Langedijk, Netherlands – 09 August 2022

Advanced materials company E-magy and renowned German research institute ZSW (Zentrum für Sonnenenergie- und Wasserstoff-Forschung Baden-Württemberg) demonstrated a less than 1% battery cell expansion for the first time in a silicon-dominant lithium-ion battery. With the company's unique nanoporous silicon, batteries are made with only silicon as the active anode material, boosting the energy that can be stored in a single battery.

Why we write about this topic:

17 Nederlandse bedrijven bouwen het eerste vliegtuig op waterstof

In 2028 moet het eerste middelgrote passagiersvliegtuig op groene waterstof van Amsterdam naar Londen kunnen vliegen. Daarbij bouwen zo'n 17 bedrijven, waaronder Fokker en TU Delft een bestaand propellervliegtuig om tot een waterstof-elektrisch vliegtuig. Michel van Ierland van Unified International brengt die partijen samen als ondernemer.

INTERVIEW 6 SEPTEMBER 2022

Region of the Future is het nieuwe innovatieprogramma van de Metropoolregio Rotterdam Den Haag (MRDH) en YES!Delft. In dit programma ontwikkelen multidisciplinaire teams slimme, schone, gezonde en duurzame nieuwe technologie, die bijdraagt aan oplossingen voor de grote regio-overstijgende uitdagingen uit de Groeiagenda Zuid-Holland. Daarnaast zorgt Region of the Future voor stage,- en afstudeerplaatsen op mbo-, hbo, - en wo-niveau, nieuwe bedrijvigheid in de regio en nieuwe banen via startups en scale-ups.

Regiobrede aanpak meer kans van slagen

De regio-overstijgende opgaven in de Groeiagenda Zuid-Holland zijn te groot om als gemeente zelfstandig op te pakken. Het reduceren van de CO2 uitstoot, zorgen voor extra economische groei in de regio, de vernieuwing van verouderde sectoren en het verbeteren van de leefbaarheid hebben meer kans van slagen bij een regiobrede aanpak. Daarom ligt hier een rol voor de 23 gemeenten van de Metropoolregio Rotterdam Den Haag. De MRDH draagt met financiering én een netwerk van gemeenten bij aan een optimale aansluiting tussen probleemhouders (gemeenten) en het technologisch ecosysteem. De MRDH verleent een subsidie aan YES!Delft van € 1.500.000 voor de periode 1 juni 2022 tot 1 juni 2025 om het programma Region of the Future uit te voeren.

GROEIAGENDA ZUID-HOLLAND

De regio staat voor grote uitdagingen

De Groeiagenda Zuid-Holland is een ambitieuze actie- en investeringsagenda van 80 overheden, bedrijven en kennisinstellingen in Zuid-Holland. De regionale partners investeren tien jaar lang 1.4 miljard euro per jaar in kennis en innovatie, de maakindustrie, energie-infrastructuur, bereikbaarheid en human capital. Van het Rijk wordt voor diezelfde periode een jaarlijkse bijdrage van 1 miljard euro gevraagd vanuit het Nationaal Groeifonds.

Upcoming Training – start 21 September

PP1 Data Science for professionals

- ✓ Understand the role data science plays in modern business and industry
- ✓ Understand essential techniques from machine learning
- ✓ Have basic experience in applying techniques using Python and SciKit-Learn
- ✓ Have an overview of the landscape of modern data engineering

Sign up via www.holland-innovative.nl

Upcoming Training – start 12 December at TPY / THT!

MT1 - Fundamentals in Medical Device Development

- ✓ Start with an idea and end with a medical device that is safe, suitable for its intended purpose, and CE certified.
- ✓ Understand the project management framework in addition to design controls & risk management
- ✓ Develop your medical device to comply with the medical device regulations and to execute projects effectively

Sign up via www.holland-innovative.nl

Upcoming Training – spring 2023

MT 2 - CE Certification of Your Medical Device

- ✓ Get an overview of the regulatory requirements and learn how to implement these in your development process.
- ✓ To set-up your technical documentation, have a quality management system in place with approved suppliers and have a proven competent team member.

Sign up via www.holland-innovative.nl

Risk Management & FMEA seminar

How to apply good risk management practices, including Failure Mode & Effect Analyses, Statistical Process Control and Feedback loops?

When: 15 September

Location: ASML Visitor Center Veldhoven

This event brought to you by:

Upcoming Training – start 21 November

PP7 Course Failure Mode & Effects Analysis (FMEA)

- ✓ A structured preparation to decrease the effort and time for the actual FMEA process
- ✓ The CTQ flow-down and system decomposition
- ✓ The results are input for the prioritization for the risk assessment
- ✓ Makes risk management fun again!

Hoe Nederland Miljarden Euro's per jaar kan besparen op energie

“Gas is now \$7 a gallon”

Me:

1. Radiatorfolie

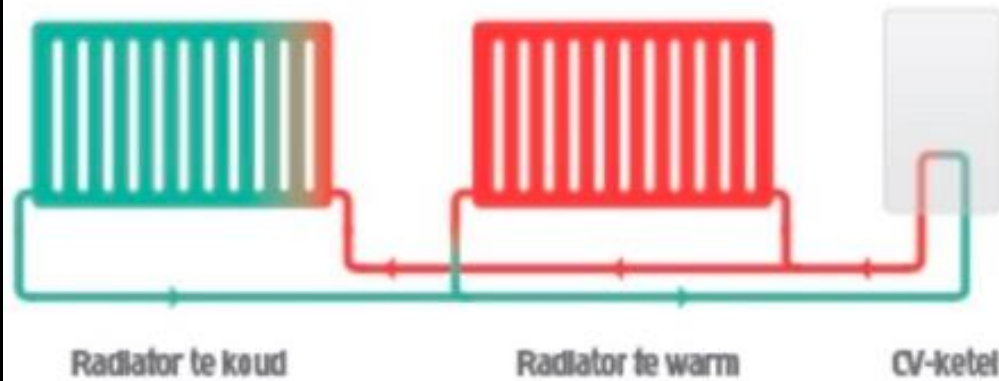

- Verhoging Rendement 10-20%
- Kosten (bij zelf doen) 10-20 euro
- Terugverdientijd 1 winter (of minder)

2. Waterzijdig Inregelen

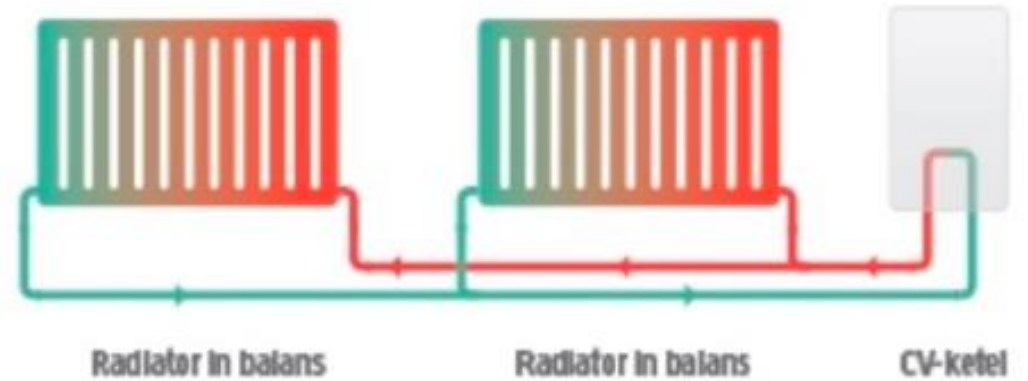

❌ Slecht ingeregelde CV-installatie:

- ❌ - Hoog gasverbruik
- ❌ - Mogelijk koude ruimtes

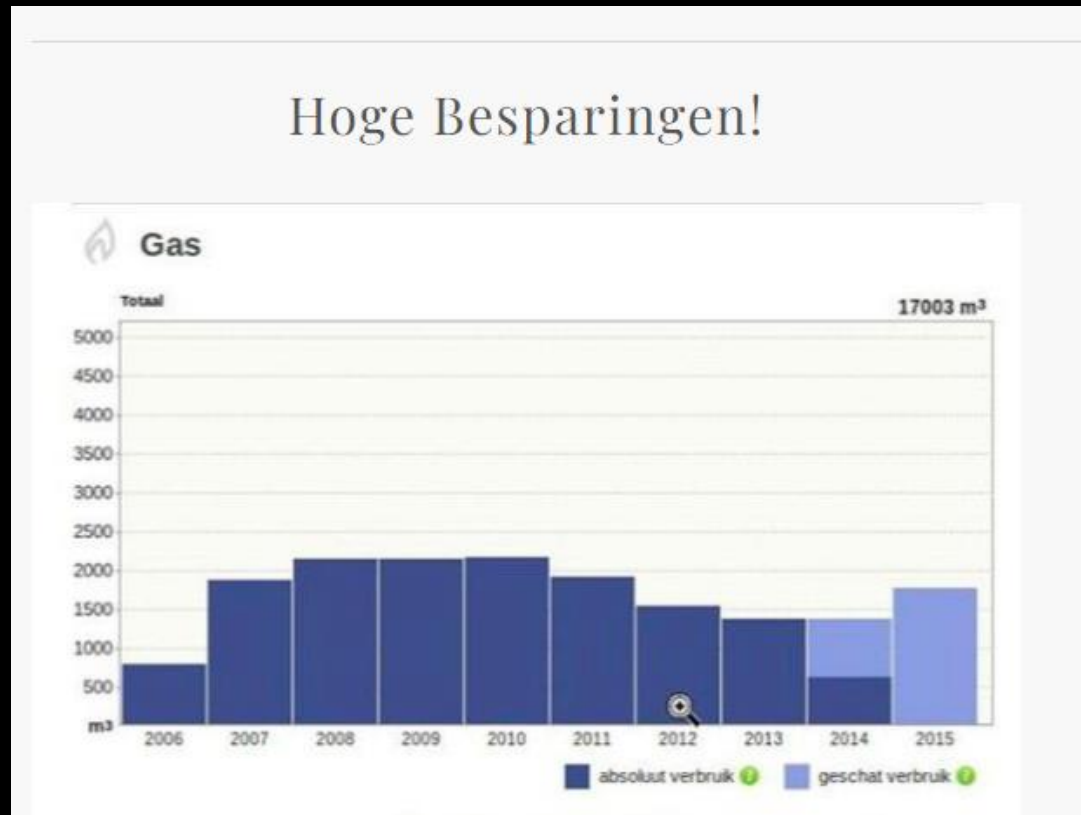

✓ Goed ingeregelde CV-installatie:

- ✓ - Laag gasverbruik
- ✓ - Hoog comfort

Verhoogd Rendement min. 15%

3. Veranderen van Temperatuurinstelling

- Combineren van maatregelen kan leiden tot 50% besparen op verwarmingskosten
- Bij mijn huidige energierekening zou dit een besparing zijn van 480 euro per jaar
- Bij energiecontract 2023 zou de besparing ca. 2000 euro zijn
- Kosten Consult ca. 130 euro
